Introduction

The purpose of this Handbook is to guide students and parents/carers in Years 11 and 12 subject selection. It includes a comprehensive list of the Queensland Curriculum and Assessment Authority (QCAA) subjects that Nerang State High School offers to cater for individual students' career pathways.

Selecting Subjects

The transition from Year 10 to Year 11 is a significant step in the career of a high school student. This transition begins with careful and informed decision making around the course of subjects to be undertaken over the next 2 years. Choices made at this stage certainly begin to shape future career options.

We expect students to make an informed choice of subjects so that their course of study is continuous and appropriate for their needs. There are many career pathways available for future success and students should consider all their options before selecting subjects.

In making subject choices students must consider:

- 1. What pre-requisite subjects are required for your course of study?
- 2. Given your current results, will you be successful in this subject?
- 3. Will you enjoy this subject?

Students commencing Year 11 at Nerang State High in 2020 are required to select subjects as follows:

- 1 Two compulsory subjects English and Mathematics
- 2 Three elective subjects
- 3 Two back up elective subjects (should your first preferences not be available)

Note: students must select electives in order of preference

Students seeking University entrance (an ATAR) will be required to select either:

- 1 5 General subjects or
- 2 4 General subjects plus 1 Applied subject or VET subject

Students not seeking University entrance may select any combination of General, Applied and VET Subjects.

Students will be required to make their selections via OneSchool. Refer to next page for subjects available, Pre-requisites for studying specific subjects and the Head of Department responsible for each subject.

Information regarding QCE, QCIA and ATAR commences page 4. For more information see Ms Wharton, Deputy Principal, Ms Teng, Head of Department Senior Schooling or Mr King, Guidance Officer.

Senior Subjects

The QCAA develops four types of senior subject syllabuses — General, Applied, Senior External Examinations and Short Courses. Results in General and Applied subjects contribute to the awarding of a QCE and may contribute to an Australian Tertiary Admission Rank (ATAR) calculation, although no more than one result in an Applied subject can be used in the calculation of a student's ATAR.

Extension subjects are extensions of the related General subjects and are studied either concurrently with, or after, Units 3 and 4 of the General course.

Typically, it is expected that most students will complete these courses across Years 11 and 12. All subjects build on the P–10 Australian Curriculum.

General Subjects

General subjects are suited to students who are interested in pathways beyond senior secondary schooling that lead primarily to tertiary studies and to pathways for vocational education and training and work. General subjects include Extension subjects.

Applied Subjects

Applied subjects are suited to students who are primarily interested in pathways beyond senior secondary schooling that lead to vocational education and training or work.

Senior External Examination

The Senior External Examination consists of individual subject examinations provided across Queensland in October and November each year by the QCAA.

Short Courses

Short Courses are developed to meet a specific curriculum need and are suited to students who are interested in pathways beyond senior secondary schooling that lead to vocational education and training and establish a basis for further education and employment. They are informed by, and articulate closely with, the requirements of the Australian Core Skills Framework (ACSF). A grade of C in Short Courses aligns with the requirements for ACSF Level 3.

For more information about the ACSF see: https://www.education.gov.au/australian-core-skills-framework.

Vocational education and training (VET)

Students can access VET programs through the school if it:

- is a registered training organisation (RTO)
- has a third-party arrangement with an external provider who is an RTO
- offers opportunities for students to undertake school-based apprenticeships or traineeships.

Upon satisfactory completion of a VET program, students will receive an Industry recognised certificate for that program.

Senior Education Profile

Students in Queensland are issued with a Senior Education Profile (SEP) upon completion of senior studies.

This profile may include a:

- Statement of Results
- Queensland Certificate of Education (QCE)
- Queensland Certificate of Individual Achievement (QCIA).

For more information about the SEP see: www.qcaa.qld.edu.au/senior/certificates-qualifications/sep.

Statement of Results

Students are issued with a Statement of Results in the December following the completion of this course of study.

Queensland Certificate of Education (QCE)

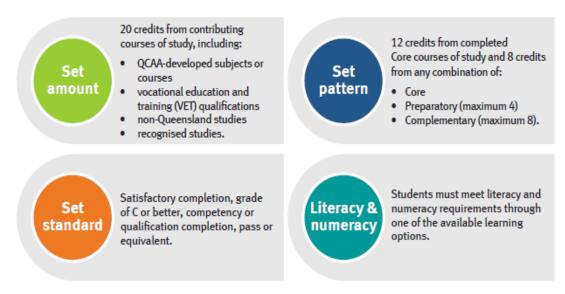

THE QCE REQUIREMENTS (FOR STUDENTS COMPLETING YEAR 12 FROM 2020 ONWARDS)

The Queensland Certificate of Education (QCE) is Queensland's senior secondary schooling qualification. It is internationally recognised and provides evidence of senior schooling achievements. The flexibility of the QCE means that students can choose from a wide range of learning options to suit their interests and career goals.

To receive a QCE, students must achieve a set amount of learning, at the set standard, in a set pattern, while meeting literacy and numeracy requirements.

QCE

For more information about the QCE requirements, see the following factsheets, which are available on the QCAA website, refer links below:

QCAA about QCE
QCE requirements
Literacy, Numeracy and complete core requirements
Credit and duplication of learning

Queensland Certificate of Individual Achievement (QCIA)

The Queensland Certificate of Individual Achievement (QCIA) reports the learning achievements of eligible students who complete an individual learning program. At the end of the senior phase of learning, eligible students achieve a QCIA. These students have the option of continuing to work towards a QCE post-secondary schooling.

Australian Tertiary Admission Rank (ATAR)

To attend University, students must obtain an ATAR. An ATAR allows tertiary admissions centres to compare students from across Australia when they apply for tertiary places. The ATAR is a number between 0 and 99.95, in increments of 0.05. ATARs below 30 are not reported.

To receive an ATAR, students must study a certain combination of subjects to be eligible.

The following combination of subjects will contribute to an ATAR:

- General Subjects
- General Subjects + 1 VET Course (either Cert III or Cert IV or Diploma)
- General Subjects + 1 Applied Subject

For more information logon to: https://www.qcaa.qld.edu.au/senior/new-snr-assessment-te/tertiary-entrance

English Requirement

Eligibility for an ATAR requires satisfactory completion of a QCAA English subject. Satisfactory completion requires students to attain a result that is a C or higher.

| COMPULSORY select 1 Maths and 1 English Subject | SUBJECT CODE | COST | SUBJECT TYPE | Prerequisites (Year 10) | HOD |

| Sports and Recreation | REC | | Applied | * | Miss Donnell |

^{*} It is preferred that all Applied Subjects meet the prerequisite of a 'C' in English.

2020-2021 SCHEDULE OF FEES

In accordance with the Education Act, the cost of providing instruction, administration and facilities for the education of students enrolled at State schools is met by the State. Parents are directly responsible for providing textbooks and other consumable resources for their children while attending school.

In recognition that these costs can be high, the school operates a Student Resource Scheme that, for a specified annual participation fee, provides for the temporary use by the student of prescribed textbooks, other resources and the purchase of consumable materials for the student.

The Student Resource Scheme fees are based on the calculation of a standard fee scheduled for each year level and additional fees linked to subjects that require a higher level of consumable resources ("High Resource Subjects") or fees payable to training providers.

| Standard fee | | | \$250.00 |
|---|----------------------------------|---|----------|
| High Resource (HR) subject: \$50.00 per subject 1 HR Subject 2 HR Subjects 3 or more HR Subjects | \$300.00 \$350.00 \$400.00 | Year 11 HR Subjects: | \$ |
| VET @Nerang Provider & Re | esource Fees | VET Trades @Nerang: \$150.00 VET Sport @Nerang: \$100.00 | \$ |
| Aquatic Practices Provider F | ees | Up-Front Fee: \$230.00 | \$ |
| | | TOTA | L: \$ |

| YEAR 12 STUDENT RESOURCE SCHEME | | | |
|--|--|----------|--|
| Standard fee | | \$250.00 | |
| High Resource (HR) subjects \$50.00 per subject 1 HR Subject \$300.00 2 HR Subjects \$350.00 3 or more HR Subjects \$400.00 | Year 12 HR Subjects: | \$ | |
| VET @Nerang Provider & Resource Fees | VET Trades @Nerang: \$150.00 VET Sport @Nerang: \$100.00 | \$ | |
| Aquatic Practices Provider Fees | Up-Front Fee: \$230.00 | \$ | |
| | TOTAL: | \$ | |

OPTIONAL COSTS

- Instrumental Music Hire \$100.00
- Voluntary P & C Contribution (per family) \$30.00
- Graphics Calculator Hire \$40.00

Please note that any excursions, camps and competitions that have an associated cost are not included in the above schedule of fees.

SUBJECT SELECTION

11

- All students are required to select five subjects.
- Maths and English are compulsory.
- Students seeking an ATAR are recommended to select five General Subjects.
- To enrol in the VET Trades Program students are required to meet with the Head of ITD to determine suitability.
- Specialist Mathematics must be studied with Mathematical Methods. ‡

High Resource subjects are underlined and attract an additional \$50 fee

General Senior Subjects

Ancient History (AHS)

General senior subject

| Prerequisite Subjects | | |
|-----------------------|--|--|
| English (B) | | |

Costs

Excursions
TBA

Overview

Ancient History provides opportunities for students to study people, societies and civilisations of the past, from the development of the earliest human communities to the end of the Middle Ages. Students explore the interaction of societies, and the impact of individuals and groups on ancient events and ways of life, and study the development of some features of modern society, such as social organisation, systems of law, governance and religion.

Students analyse and interpret archaeological and written evidence. They develop increasingly sophisticated skills and understandings of historical issues and problems by interrogating the surviving evidence of ancient sites, societies, individuals and significant historical periods. They investigate the problematic nature of evidence, pose increasingly complex questions about the past and formulate reasoned responses.

Students gain multi-disciplinary skills in analysing textual and visual sources, constructing arguments, challenging assumptions, and thinking both creatively and critically.

Pathways

A course of study in Ancient History can establish a basis for further education and employment in the fields of archaeology, history, education, psychology, sociology, law, business, economics, politics, journalism, the media, health and social sciences, writing, academia and research.

Objectives

- comprehend terms, issues and concepts
- devise historical questions and conduct research
- analyse historical sources and evidence
- synthesise information from historical sources and evidence
- evaluate historical interpretations
- create responses that communicate meaning.

In Units 1 and 2, students complete **four formative** assessments to prepare them for the assessment techniques in Units 3 and 4. The results from each of the assessments are added together to provide a subject score out of 100 and converted to an overall subject result (A-E).

| Unit | Unit Structure | Assessment Items | Weight |
|-----------|--|--|--------|
| 1 | Investigating the ancient world Digging up the past Ancient societies Beliefs, rituals and funerary practices | 1. Exam – Short Responses to historical sources Written, unseen 2 hours (+ 15 min planning time) 800 – 1000 words | 25% |
| (Year 11) | | 2. Independent source investigation Written, seen 15 hours of class time 1500 – 2000 words | 25% |
| 2 | Personalities in their time • Akhenaten • Cleopatra | 3. Investigation – Historical essay based on research Written, seen 15 hours of class time (+ own time) 1500 – 2000 words | 25% |
| (Year 11) | | 4. Exam – Essay response to historical sources Written, unseen 2 hours (+ 15 min planning time) 800 – 1000 words | 25% |

Year 12

| Unit | Unit Structure | Assessment Items | Weight |
|-----------|--|---|--------|
| 3 | Reconstructing the ancient world • Philip II and Alexander III of Macedon • Early Imperial Rome | 1. Exam – Essay in response to historical sources Written, unseen 2 hours (+ 15 min planning time) 800 – 1000 words | 25% |
| (Year 12) | | 2. Independent source investigation Written, seen 15 hours of class time (over a period of weeks) 1500 – 2000 words | 25% |
| 4 | People, power and authority Rome: Civil War and the breakdown of the Republic Augustus | 3. Investigation – Historical essay based on research Written, seen 15 hours of class time (+ own time) 1500 – 2000 words | 25% |
| (Year 12) | | 4. External Exam – Short responses to historical sources Written, unseen 2 hours (+ 15 min planning time) 800 – 1000 words | 25% |

Biology (BIO) General senior subject

Prerequisite Subjects

Biology or Chemistry or Physics (B) Extension Maths (C) or Maths (B)

EquipmentScientific Calculator

Costs Excursions

Overview

Biology provides opportunities for students to engage with living systems.

Students develop their understanding of cells and multicellular organisms. They engage with the concept of maintaining the internal environment. They study biodiversity and the interconnectedness of life. This knowledge is linked with the concepts of heredity and the continuity of life.

Students learn and apply aspects of the knowledge and skills of the discipline (thinking, experimentation, problem-solving and research skills), understand how it works and how it may impact society. They develop their sense of wonder and curiosity about life: respect for all living things and the environment; understanding of biological systems, concepts and theories; appreciation of how biological knowledge has developed over time and continues to develop; a sense of how biological knowledge influences society.

Students plan and carry out field work, laboratory and other research investigations; interpret evidence; use sound, evidence-based arguments creatively and analytically when evaluating claims and applying biological knowledge; and communicate biological understanding, findings, arguments and conclusions using appropriate representations, modes and genres.

Pathways

A course of study in Biology can establish a basis for further education and employment in the fields of medicine, forensics, veterinary, food and marine sciences, agriculture, biotechnology, environmental rehabilitation, biosecurity, quarantine, conservation and sustainability.

Objectives

- describe and explain scientific concepts, theories, models and systems, and their limitations
- Apply understanding of scientific concepts, theories, models and systems within their limitations
- Analyse evidence
- Interpret evidence
- Investigate phenomena
- Evaluate processes, claims and conclusions
- Communicate understandings, findings, arguments and conclusions.

In Units 1 and 2, students complete **four formative** assessments to prepare them for the assessment techniques in Units 3 and 4. The results from each of the assessments are added together to provide a subject score out of 100 and converted to an overall subject result (A-E).

| Unit | Unit Structure | Assessment Items | Weight |
|--------------------|--|---|--------|
| 1 | Cells and multicellular organismsCells as the basis of lifeMulticellular organisms | 1. Data testWritten, Unseen60 minutes | 10% |
| (Year 11) | | 2. Student experiment Written, seen 1500 – 2000 words 10 hours in class time | 20% |
| 2 (Year 11) | Maintaining the internal environment • Homeostasis • Infectious diseases | 3. Research investigation Written, seen 1500 – 2000 words 10 hours in class time | 20% |
| UNI ⁻ | Г1&2 | 4. Exam – based on Units 1 & 2 Written, seen 90 minutes x 2 papers | 50% |

Year 12

| Unit | Unit Structure | Assessment Items | Weight |

| 3 | Biodiversity and the interconnectedness of life Describing biodiversity Ecosystem dynamics | 1. Data testWritten, Unseen60 minutes | 10% |
| (Year 12) | | 2. Student experiment Written, seen 1500 – 2000 words 10 hours in class time | 20% |
| 4 (Year 12) | Heredity and continuity of life DNA, genes and the continuity of life Continuity of life on Earth | 3. Research investigation Written, seen 1500 – 2000 words 10 hours in class time | 20% |
| UNI | ГЗ&4 | 4. Exam – based on Units 3 & 4 Written, unseen 90 minutes x 2 papers | 50% |

Business (BUS) General senior subject

Prerequisite Subjects English (B)

| Equipment | | |
|-----------|----------|--|
| | Laptop | |
| | Notebook | |

Costs

Excursion
cost x 2

Overview

Business provides opportunities for students to develop business knowledge and skills to contribute meaningfully to society, the workforce and the marketplace and prepares them as potential employees, employers, leaders, managers and entrepreneurs.

Students investigate the business life cycle, develop skills in examining business data and information and learn business concepts, theories, processes and strategies relevant to leadership, management and entrepreneurship. They investigate the influence of, and implications for, strategic development in the functional areas of finance, human resources, marketing and operations.

Students use a variety of technological, communication and analytical tools to comprehend, analyse, interpret and synthesise business data and information. They engage with the dynamic business world (in both national and global contexts), the changing workforce and emerging digital technologies.

Pathways

A course of study in Business can establish a basis for further education and employment in the fields of business management, business development, entrepreneurship, business analytics, economics, business law, accounting and finance, international business, marketing, human resources management and business information systems.

Objectives

- describe business environments and situations
- explain business concepts, strategies and processes
- select and analyse business data and information
- interpret business relationships, patterns and trends to draw conclusions
- evaluate business practices and strategies to make decisions and propose recommendations
- create responses that communicate meaning to suit purpose and audience.

Unit Structure & Assessment

Year 11

In Units 1 and 2, students complete **four formative** assessments to prepare them for the assessment techniques in Units 3 and 4. The results from each of the assessments are added together to provide a subject score out of 100 and converted to an overall subject result (A-E).

| Unit | Unit Structure | Assessment Items | Weight |
|-----------|---|--|--------|
| 1 | Business creationFundamentals of businessCreation of business ideas | 1. ExamCombination response2 hours (+ 10 mins planning time) | 25% |
| (Year 11) | | 2. InvestigationBusiness report1500 – 2000 words | 25% |
| 2 | Business growth Establishment of a business Entering markets | 3. Extended responseFeasibility report1500 – 2000 words | 25% |
| (Year 11) | | 4. ExamCombination response2 hours (+ 10 mins planning time) | 25% |

Year 12

| 4 | Business evolutionRepositioning a businessTransformation of a business | 3. Extended responseFeasibility report1500 – 2000 words | 25% |
| (Year 12) | | 4. ExamCombination response2 hours (+ 10 mins planning time) | 25% |

Chemistry (CHM) General senior subject

Prerequisite Subjects

Biology or Chemistry of Physics (B) Extension Maths (B), Maths (A)

| Equipment | Costs |
|-----------------------|-------|
| Scientific Calculator | \$0 |

Overview

Chemistry is the study of materials and their properties and structure.

Students study atomic theory, chemical bonding, and the structure and properties of elements and compounds. They explore intermolecular forces, gases, aqueous solutions, acidity and rates of reaction. They study equilibrium processes and redox reactions. They explore organic chemistry, synthesis and design to examine the characteristic chemical properties and chemical reactions displayed by different classes of organic compounds.

Students develop their appreciation of chemistry and its usefulness; understanding of chemical theories, models and chemical systems; expertise in conducting scientific investigations. They critically evaluate and debate scientific arguments and claims in order to solve problems and generate informed, responsible and ethical conclusions, and communicate chemical understanding and findings through the use of appropriate representations, language and nomenclature.

Students learn and apply aspects of the knowledge and skills of the discipline (thinking, experimentation, problem-solving and research skills), understand how it works and how it may impact society.

Pathways

A course of study in Chemistry can establish a basis for further education and employment in the fields of forensic science, environmental science, engineering, medicine, pharmacy and sports science.

Objectives

- describe and explain scientific concepts, theories, models and systems and their limitations
- apply understanding of scientific concepts, theories, models and systems within their limitations
- analyse evidence
- interpret evidence
- investigate phenomena
- evaluate processes, claims and conclusions
- communicate understandings, findings, arguments and conclusions.

In Units 1 and 2, students complete **four formative** assessments to prepare them for the assessment techniques in Units 3 and 4. The results from each of the assessments are added together to provide a subject score out of 100 and converted to an overall subject result (A-E).

| 4 (Year 12) | Structure, synthesis and design Properties and structure of organic materials Chemical synthesis and design | 3. Research investigation Written, seen 1500 – 2000 words 10 hours in class time | 20% |
| UNIT 3 & 4 | | 4. Exam – based on Units 3 & 4 Written, unseen 90 minutes x 2 papers | 50% |

Dance (DAN) General senior subject

Prerequisite Subjects English (C) Dance (C)

Performing Arts T-shirt, Dance tights and Dance shoes (optional)

Costs \$0

Overview

Dance fosters creative and expressive communication. It uses the body as an instrument for expression and communication of ideas. It provides opportunities for students to critically examine and reflect on their world through higher order thinking and movement. It encourages the holistic development of a person, providing a way of knowing about oneself, others and the world.

Students study dance in various genres and styles, embracing a variety of cultural, societal and historical viewpoints integrating new technologies in all facets of the subject. Historical, current and emerging dance practices, works and artists are explored in global contexts and Australian contexts, including the dance of Aboriginal peoples and Torres Strait Islander peoples. Students learn about dance as it is now and explore its origins across time and cultures.

Students apply critical thinking and literacy skills to create, demonstrate, express and reflect on meaning made through movement. Exploring dance through the lens of making and responding, students learn to pose and solve problems, and work independently and collaboratively. They develop aesthetic and kinaesthetic intelligence, and personal and social skills.

Pathways

A course of study in Dance can establish a basis for further education and employment in the field of dance, and to broader areas in creative industries and cultural institutions, including arts administration and management, communication, education, public relations, research, and science and technology.

Objectives

- demonstrate an understanding of dance concepts and skills
- apply literacy skills
- · organise and apply the dance concepts
- analyse and interpret dance concepts and skills
- apply technical skills
- realise meaning through expressive skills
- create dance to communicate meaning
- evaluate dance, justifying the use of dance concepts and skills.

In Units 1 and 2, students complete **four formative** assessments to prepare them for the assessment techniques in Units 3 and 4. The results from each of the assessments are added together to provide a subject score out of 100 and converted to an overall subject result (A-E).

Drama (DRA) General senior subject

Prerequisite Subjects English (C)

| Equipment | | |
|-----------|--|--|
| | Black leggings or pants Performing Arts T-shirt | |

| Costs | |
|-------|--|
| \$0 | |

Overview

Drama fosters creative and expressive communication. It interrogates the human experience by investigating, communicating and embodying stories, experiences, emotions and ideas that reflect the human experience. It engages students in imaginative meaning-making processes and involves them using a range of artistic skills as they make and respond to dramatic works.

Students experience, reflect on, understand, communicate, collaborate and appreciate different perspectives of themselves, others and the world in which they live. They learn about the dramatic languages and how these contribute to the creation, interpretation and critique of dramatic action and meaning for a range of purposes. They study a range of forms, styles and their conventions in a variety of inherited traditions, current practice and emerging trends, including those from different cultures and contexts.

Students learn how to engage with dramatic works as both artists and audience through the use of critical literacies. The study of drama develops students' knowledge, skills and understanding in the making of and responding of dramatic work to help them realise their creative and expressive potential as individuals. Students learn to pose and solve problems, and a work independently and collaboratively.

Pathways

A course of study in Drama can establish a basis for further education and employment in the field of drama, and to broader areas in creative industries and cultural institutions, including arts administration and management, communication, education, public relations, research and science and technology.

Objectives

- demonstrate an understanding of dramatic languages
- apply literacy skills
- organise and apply dramatic languages
- analyse how dramatic languages are used to create dramatic action and meaning
- interpret purpose, context and text to communicate dramatic meaning
- manipulate dramatic languages to create dramatic action and meaning
- evaluate and justify the use of dramatic languages to communicate dramatic meaning
- synthesise and argue a position about dramatic action and meaning

In Units 1 and 2, students complete **four formative** assessments to prepare them for the assessment techniques in Units 3 and 4. The results from each of the assessments are added together to provide a subject score out of 100 and converted to an overall subject result (A-E).

| Unit | Unit Structure | Assessment Items | Weight |

| Costs | |
|-------|--|
| \$0 | |

Overview

English focuses on the study of both literary texts and non-literary texts, developing students as independent, innovative and creative learners and thinkers who appreciate the aesthetic use of language, analyse perspectives and evidence, and challenge ideas and interpretations through the analysis and creation of carried texts.

Students are offered opportunities to interpret and create texts for personal, cultural, social and aesthetic purposes. They learn how language varies according to context, purpose and audience, content, modes and mediums, and how to use it appropriately and effectively for a variety of purposes. Students have opportunities to engage with diverse texts to help them develop a sense of themselves, their world and their place in it.

Students communicate effectively in Standard Australian English for the purposes of responding to and creating texts. They make choices about generic structures, language, textual features and technologies for participating actively in literary analysis and the creation of texts in a range of modes, mediums and forms, for a variety of purposes and audiences. They explore how literary and non-literary texts shape perception of the world, and consider ways in which texts may reflect or challenge social and cultural ways of thinking and influence audiences.

Pathways

A course of study in English promotes open-mindedness, imagination, critical awareness and intellectual flexibility – skills that prepare students for local and global citizenship, and for lifelong learning across a wide range of contexts.

Objectives

- use patterns and conventions of genres to achieve particular purposes in cultural contexts and social situations
- establish and maintain roles of the writer/speaker/signer/designer and relationships with audiences
- create and analyse perspectives and representations of concepts, identities, times and places
- make use of and analyse the ways cultural assumptions, attitudes, values and beliefs underpin texts and invite audiences to take up positions
- use aesthetic features and stylistic devices to achieve purposes and analyse their effects in texts
- select and synthesise subject matter to support perspectives
- organise and sequence subject matter to achieve particular purposes
- use cohesive devices to emphasise ideas and connect parts of texts
- make language choices for particular purposes and contexts
- use grammar and language structures for particular purposes
- use mode-appropriate features to achieve particular purposes.

In Units 1 and 2, students complete **four formative** assessments to prepare them for the assessment techniques in Units 3 and 4. The results from each of the assessments are added together to provide a subject score out of 100 and converted to an overall subject result (A-E).

| Unit | Unit Structure | Assessment Items | Weight |

General Mathematics (MAG)

General senior subject

Prerequisite Subjects

Mathematics (B) English (C)

Equipment

Scientific Calculator - Casio fx-82AU

Costs \$0

Overview

General Mathematics' major domains are Number and algebra, Measurement and geometry, Statistics, and Networks and matrices, building on the content of the P-10 Australian Curriculum.

General Mathematics is designed for students who want to extend their mathematical skills beyond Year 10 but whose future studies or employment pathways do not require calculus.

Students build on and develop key mathematical ideas, including rates and percentages, concepts from financial mathematics, linear and non-linear expressions, sequences, the use of matrices and networks to model and solve authentic problems, the use of trigonometry to find solutions to practical problems, and the exploration of real-world phenomena in statistics.

Students engage in a practical approach that equips learners for their needs as future citizens. They learn to ask appropriate questions, map out pathways, reason about complex solutions, set up models and communicate in different forms. They experience the relevance of mathematics to their daily lives, communities and cultural backgrounds. They develop the ability to understand, analyse and take action regarding social issues in their world.

Pathways

A course of study in General Mathematics can establish a basis for further education and employment in the fields of business, commerce, education, finance, IT, social science and the arts.

Objectives

- select, recall and use facts, rules, definitions and procedures drawn from Number and algebra, Measurement and geometry, Statistics, and Networks and matrices
- comprehend mathematical concepts and techniques drawn from Number and algebra, measurement and geometry, Statistics, and Networks and matrices
- communicate using mathematical, statistical and everyday language and conventions
- evaluate the reasonableness of solutions
- justify procedures and decisions by explaining mathematical reasoning
- solve problems by applying mathematical concepts and techniques drawn from Number and algebra, Measurement and geometry, Statistics, and Networks and matrices.

Unit Structure & Assessment

Year 11

In Units 1 and 2, students complete **four formative** assessments to prepare them for the assessment techniques in Units 3 and 4. The results from each of the assessments are added together to provide a subject score out of 100 and converted to an overall subject result (A-E).

| Unit | Unit Structure | Assessment Items | Weight |
|--------------------|---|--|--------|
| 1 | Money, measurement and relations Consumer arithmetic Shape and measurement Linear equations and their graphs | 1. Problem-solving and modelling task Written, seen Up to 10 pages, excluding appendices 4 weeks (including 3 hours class time) | 20% |
| (Year 11) | | 2. ExamShort response, unseen120 mins (+ 5 min planning time) | 15% |
| 2 (Year 11) | Applied trigonometry, algebra, matrices and univariate data • Applications of trigonometry • Algebra and matrices • Univariate data analysis | 3. ExamShort response, unseen120 mins (+ 5 mins planning time) | 15% |
| UNIT 1 & 2 | | 4a. Exam – based on Units 1 & 2 Short response, unseen 90 minutes (+ 5 minutes planning time) | 25% |
| | | 4b. Exam – based on Units 1 & 2 Short response, unseen 90 minutes (+ 5 minutes planning time) | 25% |

Year 12

Overview

Geography focuses on the significance of 'place' and 'space' in understanding our world. Students engage in a range of learning experiences that develop their geographical skills and thinking through the exploration of geographical challenges and their effects on people, places and the environment.

Students investigate places in Australia and across the globe to observe and measure spatial, environmental, economic, political, social and cultural factors. They interpret global concerns and challenges including responding to risk in hazard zones, planning sustainable places, managing land cover transformations and planning for population change. They develop an understanding of the complexities involved in sustainable planning and management practices.

Students observe, gather, organise, analyse and present data and information across a range of scales. They engage in real-world applications of geographical skills and thinking, including the collection and representation of data.

Pathways

A course of study in Geography can establish a basis for further education and employment in the fields of urban and management, biological and environmental science; conservation and land management; emergency response and hazard management; oceanography, surveying, global security, economics, business, law, engineering, architecture, information technology, and science.

Objectives

- Explain geographical processes
- Comprehend geographic patterns
- Analyse geographical data and information
- Apply geographical understanding
- Synthesise information from the analysis to propose action
- Communicate geographical understanding.

In Units 1 and 2, students complete **four formative** assessments to prepare them for the assessment techniques in Units 3 and 4. The results from each of the assessments are added together to provide a subject score out of 100 and converted to an overall subject result (A-E).

| Unit | Unit Structure | Assessment Items | Weight |
|-----------|--|---|--------|
| 1 | Responding to risk and vulnerability in hazard zones Natural hazard zones Ecological hazard zones | 1. Exam Combination response, unseen 2 hours (+15 mins planning time) Part A (Short response): 50 – 150 words per question Part B (Extended response): 450 – 600 words | 25% |
| (Year 11) | | 2. Investigation Field report, seen 1500 – 2000 words Spatial technologies and ICT must be used | 25% |
| 2 | Planning sustainable places Responding to challenges facing a place in Australia Managing the challenges facing a megacity | 3. Investigation Data report, seen 1500 – 2000 words Raw data is provided by teacher Spatial technologies and ICT must be used | 25% |
| (Year 11) | | 4. Exam Combination response, unseen 2 hours (+ 15 mins planning time) Part A (Short response): 50 – 150 words per question Part B (Extended response): 450 – 600 words | 25% |

| | Nil | |
| | | |

| Costs | |
|-------|--|
| \$0 | |

Overview

Japanese provides students with the opportunity to reflect on their understanding of the Japanese language and the communities that use it, while also assisting in the effective negotiation of experiences and meaning across cultures and languages. Students participate in a range of interactions in which they exchange meaning, develop intercultural understanding and become active participants in understanding and constructing written, spoken and visual texts.

Students communicate with people from Japanese-speaking communities to understand the purpose and nature of language and to gain understanding of linguistic structures. They acquire language in social and cultural settings and communicate across a range of contexts for a variety of purposes.

Students experience and evaluate a range of different text types; reorganise their thinking to accommodate other linguistic and intercultural knowledge and textual conventions; and create texts for a range of contexts, purposes and audiences.

Pathways

A course of study in Japanese can establish a basis for further education and employment in many professions and industries, particularly those where the knowledge of an additional language and the intercultural understanding it encompasses could be of value, such as business, hospitality, law, science, technology, sociology and education.

Objectives

- comprehend Japanese to understand information, ideas, opinions and experiences
- identify tone, purpose, context and audience to infer meaning, values and attitudes
- analyse and evaluate information and ideas to draw conclusions and justify opinions, ideas and perspectives
- apply knowledge of Japanese language elements, structures and textual conventions to convey meaning appropriate to context, purpose, audience and cultural conventions
- structure, sequence and synthesise information to justify opinions, ideas and perspectives
- use strategies to maintain communication and exchange meaning in Japanese.

In Units 1 and 2, students complete **four formative** assessments to prepare them for the assessment techniques in Units 3 and 4. The results from each of the assessments are added together to provide a subject score out of 100 and converted to an overall subject result (A-E).

Legal Studies (LEG) General senior subject

Prerequisite Subjects English (B)

Costs

Excursions
TBA

Overview

Legal Studies focuses on the interaction between society and the discipline of law and explores the role and development of law in response to current issues. Students study the legal system and how it regulates activities, while balancing these with obligations and responsibilities.

Students study the foundations of law, the criminal justice process and the civil justice system. They critically examine issues of governance, explore contemporary issues of law reform and change, and consider Australian and international human rights issues.

Students develop skills of inquiry, critical thinking, problem-solving and reasoning to make informed and ethical decisions and recommendations. They identify and describe legal issues, explore information and data, analyse, evaluate to make decisions or propose recommendations, and create responses that convey legal meaning. They question, explore and discuss tensions between changing social values, justice and equitable outcomes.

Pathways

A course of study in Legal Studies can establish a basis for further education and employment in the fields of law, law enforcement, criminology, justice studies and politics. The knowledge, skills and attitudes students gain are transferable to all discipline areas and post-schooling tertiary pathways. The research and analytical skills this course develops are universally valued in business, health, science and engineering industries.

Objectives

- comprehend legal concepts, principles and processes
- Select legal information from sources
- Analyse legal issues
- Evaluate legal situations
- Create responses that communicate meaning.

In Units 1 and 2, students complete **four formative** assessments to prepare them for the assessment techniques in Units 3 and 4. The results from each of the assessments are added together to provide a subject score out of 100 and converted to an overall subject result (A-E).

Mathematical Methods (MAM)

General senior subject

Prerequisite Subjects

Maths Extension (B) English (C)

Equipment

Graphics Calculator (TI-84 Plus can be hired from book room)

| Costs | |
|-------|--|
| \$0 | |

Overview

Mathematical Methods' major domains are Algebra, Functions, relations and their graphs, Calculus and Statistics.

Mathematical Methods enables students to see the connections between mathematics and other areas of the curriculum and apply their mathematical skills to real-world problems, becoming critical thinkers, innovators and problem-solvers.

Students learn topics that are developed systematically, with increasing levels of sophistication, complexity and connection, and build on algebra, functions and their graphs, and probability from the P-10 Australian Curriculum, Calculus is essential for developing an understanding of the physical world. The domain Statistics is used to describe and analyse phenomena involving uncertainty and variation. Both are the basis for developing effective models of the world and solving complex and abstract mathematical problems.

Students develop the ability to translate written, numerical, algebraic, symbolic and graphical information from one representation to another. They make complex use of factual knowledge to successfully formulate, represent and solve mathematical problems.

Pathways

A course of study in Mathematical Methods can establish a basis for further education and employment in the fields of natural and physical sciences (especially physics and chemistry), mathematics and science education, medical and health sciences (including human biology, biomedical science, nanoscience and forensics), engineering (including chemical, civil, electrical and mechanical engineering, avionics, communications and mining), computer science (including electronics and software design), psychology and business.

Objectives

- select, recall and use facts, rules, definitions and procedures drawn from Algebra, Functions, relations and their graphs, Calculus and Statistics
- comprehend mathematical concepts and techniques drawn from Algebra, Functions, relations and their graphs, Calculus and Statistics
- communicate using mathematical, statistical and everyday language and conventions
- evaluate the reasonableness of solutions
- justify procedures and decisions by explaining mathematical reasoning
- solve problems by applying mathematical concepts and techniques drawn from Algebra, Functions, relations and their graphs, Calculus and Statistics.

Unit Structure & Assessment

Music (MUS) General senior subject

Prerequisite Subjects

English (B)
Music (B)/Ext Music

| Equipment | | |
|-----------|------------|--|
| | Instrument | |
| | instrument | |

Costs \$0

Overview

Music fosters creative and expressive communication. It allows students to develop musicianship through making (composition and performance) and responding (musicology).

Through composition, performance and musicology, students use and apply music elements and concepts. They apply their knowledge and understanding to convey meaning and/or emotion to an audience.

Students use essential literacy skills to engage in a multimodal world. They demonstrate practical music skills, and analyse and evaluate music in a variety of contexts, styles and genres.

Pathways

A course of study in Music can establish a basis for further education and employment in the fields of arts administration, communication, education, creative industries, public relations and science and technology.

Objectives

- Demonstrate technical skills
- Explain music elements and concepts
- Use music elements and concepts
- Analyse music
- Apply compositional devices
- Apply literacy skills interpret music elements and concepts
- Evaluate music to justify the use of music elements and concepts
- Realise music ideas
- Resolve music ideas.

Year 11

In Units 1 and 2, students complete **four formative** assessments to prepare them for the assessment techniques in Units 3 and 4. The results from each of the assessments are added together to provide a subject score out of 100 and converted to an overall subject result (A-E).

| Unit | Unit Structure | Assessment Items | Weight |
|--------------------|---|--|--------|
| | Designs Through inquiry learning, the following is explored: | 1. Composition Minimum of 16 bars or 30 secs 200 – 300 word, compositional statement | 20% |
| 1 (Year 11) | How does the treatment and combination of different music elements enable musicians to design music that communicates meaning through performance and composition? | 2. Integrated Project Multimodal Presentation 3 – 5 mins 8 – 10 pages, PowerPoint 150 – 300 word, composition or performance statement EITHER 16 bar or 30 sec composition OR 2 – 3 min performance | 20% |
| | Identities Through inquiry learning, the following is explored: | 3. Extended Written Task Open Book 800 – 1000 words | 35% |
| 2 (Year 11) | How do musicians use their understanding of music elements, concepts and practices to communicate cultural, political, social and personal identities when performing, composing and responding to music? | 4. Performance 2 - 3 mins 200 - 300 words, written statement | 25% |

| 4 | Narratives Through inquiry learning, the following is explored: | 3. Integrated performance • Musicology and performance • 6 – 8 mins per student | 25% |
| (Year 12) | How do musicians manipulate music elements to communicate narrative when performing, composing and responding to music? | 4. External Exam External response 2 hours 20 mins 800 – 1000 words | 25% |

Music Extension (Composition) (MUX)

General senior subject

Prerequisite Subjects By Invitation

| Equipment | |
|-----------|------------|
| | Instrument |

Costs \$0

Overview

Music Extension (Composition) is an extension of the Music General senior syllabus. It provides an opportunity for students with specific abilities in music to extend their expertise. Students select one specialisation only, and follow an individual program of study designed to continue the development of refined musicianship skills. Music Extension encourages students to investigate music concepts and ideas relevant to their specialisation.

In the Composition specialisation (making), students create and resolve new music works. They demonstrate use of music concepts and manipulate music concepts to express meaning and/or emotion to an audience through resolved compositions.

Pathways

A course of study in Music Extension can establish a basis for further education and employment in the fields of arts administration, communication, education, creative industries, public relations and science and technology.

Objectives

By the conclusion of the course of study, students will:

- apply literary skills
- evaluate music and ideas about music
- examine music and ideas about music
- express meaning, emotion or ideas about music
- apply compositional devices
- · manipulate music elements and concepts
- resolve music ideas.

Music Extension (Musicology) (MUX)

General senior subject

By Invitation

Prerequisite Subjects

| Equipment | | |
|-----------|-----|--|
| | Nil | |

General

Overview

Music Extension (Musicology) is an extension of the Music General senior syllabus. It provides an opportunity for students with specific abilities in music to extend their expertise. Students select one specialisation only, and follow an individual program of study designed to continue the development of refined musicianship skills. Music Extension encourages students to investigate music concepts and ideas relevant to their specialisation.

In the Musicology specialisation (responding), students investigate and analyse music works and ideas. They synthesise analytical information about music, and document sources and references about music to support research.

Pathways

A course of study in Music Extension can establish a basis for further education and employment in the fields of arts administration, communication, education, creative industries, public relations and science and technology.

Objectives

- apply literary skills
- evaluate music and ideas about music
- examine music and ideas about music
- express meaning, emotion or ideas about music
- analyse music
- investigate music
- synthesise information.

Music Extension (Performance) (MUX)

General senior subject

Prerequisite Subjects By Invitation

| Equipment | | |
|-----------|-------------|--|
| | | |
| | Instruments | |
| | | |

| Costs | |
|-------|--|
| \$0 | |

Overview

Music Extension (Performance) is an extension of the Music General senior syllabus. It provides an opportunity for students with specific abilities in music to extend their expertise. Students select one specialisation only, and follow an individual program of study designed to continue the development of refined musicianship skills. Music Extension encourages students to investigate music concepts and ideas relevant to their specialisation.

In the Performance specialisation (making), students realise music works, demonstrating technical skills and understanding. They make decisions about music, interpret music elements and concepts, and express music ideas to realise their performances.

Pathways

A course of study in Music Extension can establish a basis for further education and employment in the fields of arts administration, communication, education, creative industries, public relations and science and technology.

Objectives

By the conclusion of the course of study, students will:

- apply literary skills
- · evaluate music and ideas about music
- examine music and ideas about music
- express meaning, emotion or ideas about music
- apply technical skills
- interpret music elements and concepts
- realise music ideas.

Year 12

| Unit | Unit Structure | Assessment Items | Weight |

Physical Education (PED)

General senior subject

Prerequisite Subjects English (B)

| Equipment | | |
|---|--|--|
| Laptop; Notebook; Stationery; Sports Uniform | | |

| Costs |
|-------|
| \$0 |

Overview

Physical Education provides students with knowledge, understanding and skills to explore and enhance their own and others' health and physical activity in diverse and changing contexts.

Physical Education provides a philosophical and educative framework to promote deep learning in three dimensions: about, through and in physical activity contexts. Students optimise their engagement and performance in physical activity as they develop an understanding and appreciation of the interconnectedness of these dimensions.

Students learn how body movement concepts and the scientific bases of biophysical, sociocultural and psychological concepts are relevant to their performance in physical activity. They engage in a range of activities to develop movement sequences and movement strategies.

Students learn experientially through three stages of an inquiry approach to make connections between the scientific bases and the physical activity contexts. They recognise and explain concepts and principles about and through movement, and demonstrate and apply these concepts to movement sequences and strategies.

Through their purposeful engagement in physical activities, students gather data to analyse, synthesise and devise strategies to optimise participation and performance. They engage in reflective decision-making as they evaluate and justify strategies to achieve a particular outcome.

Pathways

A course of study in Physical Education can establish a basis for further education and employment in the fields of exercise science, biomechanics, the allied health professions, psychology, teaching , sport journalism, sport marketing and management, sport promotion, sport development and coaching.

Objectives

- recognise and explain concepts and principles about movement
- demonstrate specialised movement sequences and movement strategies
- apply concepts to specialised movement sequences and movement strategies
- analyse and synthesise data to devise strategies about movement
- evaluate strategies about and in movement
- justify strategies about and in movement
- make decisions about and use language, conventions and mode-appropriate features for particular purposes and contexts.

Year 11

In Units 1 and 2, students complete **four formative** assessments to prepare them for the assessment techniques in Units 3 and 4. The results from each of the assessments are added together to provide a subject score out of 100 and converted to an overall subject result (A-E).

| Unit | Unit Structure | Assessment Items | Weight |
|---|---|--|--------|
| Motor learning, functional anatomy, biomechanics and physical activity • Motor learning integrated with a selected physical activity • Functional anatomy and biomechanics integrated with a selected physical activity | 1a. Physics (PHY) General senior subject

Prerequisite Subjects

Biology or Chemistry of Physics (B) Extension Maths (B) or Maths (A)

Scientific Calculator \$0

Pathways

A course of study in Physics can establish a basis for further education and employment in the fields of science, engineering, medicine and technology.

Objectives

By the conclusion of the course of study, students will:

- describe and explain scientific concepts, theories, models and systems and their limitations
- apply understanding of scientific concepts, theories, models and systems within their limitations
- analyse evidence
- interpret evidence
- investigate phenomena
- evaluate processes, claims and conclusion
- communicate understandings, findings, arguments and conclusions.

Overview

Physics provides opportunities for students to engage with classical and modern understandings of the universe.

Students learn about the fundamental concepts of thermodynamics, electricity and nuclear processes; and about the concepts and theories that predict and describe the linear motion of objects. Further, they explore how scientists explain some phenomena using an understanding of waves. They engage with the concepts of gravitational and electromagnetic fields, and the relevant forces associated with them. They study modern physics theories and models that, despite being counterintuitive, are fundamental to our understanding of many common observable phenomena.

Students develop appreciation of the contribution physics makes to society; understanding that diverse natural phenomena may be explained, analysed and predicted using concepts, models and theories that provide a reliable basis for action; and that natter and energy interact in physical systems across a range of scales. They understand how models and theories are refined, and new ones developed in physics; investigate phenomena and solve problems; collect and analyse data; and interpret evidence. Students use accurate and precise measurement, valid and reliable evidence, and scepticism and intellectual rigour to evaluate claims; and communicate physics understanding, findings, arguments and conclusions using appropriate representations, modes and genres.

Students learn and apply aspects of the knowledge and skills of the discipline (thinking, experimentation, problem-solving and research skills), understand how it works and how it may impact society.

Year 11

In Units 1 and 2, students complete **four formative** assessments to prepare them for the assessment techniques in Units 3 and 4. The results from each of the assessments are added together to provide a subject score out of 100 and converted to an overall subject result (A-E).

Specialist Mathematics (MAS)

General senior subject

Prerequisite Subjects

Maths Ext (B) English (C)

Equipment

Graphics Calculator (TI-84 Plus can be hired from book room)

Costs \$0

Overview

Specialist Mathematics' major domains are Vectors and matrices, Real and complex numbers, Trigonometry, Statistics and Calculus.

Specialist Mathematics is designed for students who develop confidence in their mathematical knowledge and ability, and gain a positive view of themselves as mathematics learners. They will gain an appreciation of the true nature of mathematics, its beauty and its power.

Students learn topics that are developed systematically, with increasing levels of sophistication, complexity and connection, building on functions, calculus, statistics from Mathematical Methods, while vectors, complex numbers and matrices are introduced. Functions and calculus are essential for creating models of the physical world. Statistics are used to describe and analyse phenomena involving probability, uncertainty and variation. Matrices, complex numbers and vectors are essential tools for explaining abstract or complex relationships that occur in scientific and technological endeavours.

Student learning experiences range from practising essential mathematical routines to developing procedural fluency, through to investigating scenarios, modelling the real world, solving problems and explaining reasoning.

Pathways

A course of study in Specialist Mathematics can establish a basis for further education and employment in the fields of science, all branches of mathematics and statistics, computer science, medicine, engineering, finance and economics.

Objectives

- select, recall and use facts, rules, definitions and procedures drawn from Vectors and matrices, Real and complex numbers, Trigonometry, Statistics and Calculus
- comprehend mathematical concepts and techniques drawn from Vectors and matrices, Real and complex numbers, Trigonometry, Statistics and Calculus
- communicate using mathematical, statistical and everyday language and conventions
- evaluate the reasonableness of solutions
- justify procedures and decisions, and prove propositions by explaining mathematical reasoning
- solve problems by applying mathematical concepts and techniques drawn from Vectors and matrices, real and complex numbers, Trigonometry, Statistics and Calculus.

Year 11

In Units 1 and 2, students complete **four formative** assessments to prepare them for the assessment techniques in Units 3 and 4. The results from each of the assessments are added together to provide a subject score out of 100 and converted to an overall subject result (A-E).

| Unit | Unit Structure | Assessment Items | Weight |
|--------------------|--|---|--------|
| 1 | Combinatorics, vectors and proof Combinatorics Vectors in the plane Introduction to proof | 1. Problem solving and modelling task Written, seen Up to 10 pages (excluding appendices) 4 weeks (including 3 hours class time) | 20% |
| (Year 11) | | 2. Short response examUnseen120 mins (+ 5 mins planning time) | 15% |
| 2 (Year 11) | Complex numbers, trigonometry, functions and matrices Complex numbers 1 Trigonometry and functions Matrices | 3. Short response exam Unseen 120 mins (+ 5 mins planning time) | 15% |

Visual Art (ART) General senior subject

QCE 4 General

Prerequisite Subjects

English (C) Year 9 or Year 10 Art (C)

Equipment

Laptop with a USB port (refer BYOD specification - top end range); Adobe Illustrator; Photoshop

Costs \$50 HR

Overview

Visual Art provides students with opportunities to understand and appreciate the role of visual art in past and present traditions and cultures, as well as the contributions of contemporary visual artists and their aesthetic, historical and cultural influences. Students interact with artists, artworks, institutions and and communities enrich their experiences to understandings of their own and others' art practices.

Students have opportunities to construct knowledge and communicate personal interpretations by working as both artist and audience. They use their imagination and creativity to innovatively solve problems and experiment with visual language and expression.

Through an inquiry learning model, students develop critical and creative thinking skills. They create individualised responses and meaning by applying diverse materials, techniques, technologies and art processes.

In responding to artworks, students employ essential literacy skills to investigate artistic expression and critically analyse artworks in diverse contexts. They consider meaning, purposes and theoretical approaches when ascribing aesthetic value and challenging ideas.

Pathways

A course of study in Visual Art can establish a basis for further education and employment in the fields of arts practice, design, craft, and information technologies; broader areas in creative industries and cultural institutions; and diverse fields that use skills inherent in the subject, including advertising, arts administration and management, communication, design, education, galleries and museums, film and television, public relations, and science and technology.

Objectives

- implement ideas and representations
- apply literacy skills
- analyse and interpret visual language, expression and meaning in artworks and practices
- evaluate art practices, traditions, cultures and theories
- justify viewpoints
- experiment in response to stimulus
- create meaning through the knowledge and understanding of materials, techniques, technologies and art processes
- realise responses to communicate meaning.

Year 11

In Units 1 and 2, students complete **four formative** assessments to prepare them for the assessment techniques in Units 3 and 4. The results from each of the assessments are added together to provide a subject score out of 100 and converted to an overall subject result (A-E).

| Unit | Unit Structure | Assessment Items | Weight |

Applied Subjects

^{*} It is preferred that all Applied Subjects have a prerequisite of a 'C' in English.

Aquatic Practices (AQP)

Applied senior subject

Prerequisite Subjects

Equipment

For specific units of work students will be required to supply their own equipment at times. Sailing – Reef Shoes (approx. \$10)

Costs \$230

Overview

Aquatic Practices provides opportunities for students to explore, experience and learn practical skills and knowledge valued in aquatic workplaces and other settings.

Students gain insight into the management of aquatic regions and their ecological and environmental systems, helping them to position themselves within a long and sustainable tradition of custodianship.

Students have opportunities to learn in, through and about aquatic workplaces, events and other related activities. Additional learning links to an understanding of employment, study and recreational opportunities associated with communities who visit, live or work on and around our waterways.

Pathways

A course of study in Aquatic Practices can establish a basis for further education and employment in the fields of recreation, tourism, fishing and aquaculture. The subject also provides a basis for participating in and contributing to community associations, events and activities, such as yacht and sailing club races and competitions and boating shows.

Objectives

- describe concepts and ideas in aquatic contexts
- explain concepts and ideas in aquatic contexts
- demonstrate skills in aquatic contexts
- analyse information, situations and relationships in aquatic contexts
- apply knowledge, understanding and skills in aquatic
 contexts.
- use language conventions and features appropriate to aquatic contexts to communicate ideas and information, according to purpose
- generate plans and procedures for activities in aquatic contexts
- evaluate the safety and effectiveness of activities in aquatic contexts
- make recommendations for activities in aquatic contexts.

Year 11

In Units 1 and 2, students complete **four formative** assessments to prepare them for the assessment techniques in Units 3 and 4. The results from each of the assessments are added together to provide a subject score out of 100 and converted to an overall subject result (A-E).

| Unit | Unit Structure | Assessment Items | Weight |
|-----------|---|---|--------|
| 1 | EnvironmentalSurf survivalSurf Culture | 1. A response to a single task, situation and/or scenario. Multimodal: 3 – 6 minutes Performance and product: continuous class time | 25% |

Dance in Practice (DIP)

Applied senior subject

Prerequisite Subjects Dance (C)

| Equipment | |
|---|--|
| Performance Arts T-shirt; Dance tights and Dance shoes (optional) | |

| Costs | |
|------------|--|
| | |
| \$0 | |
| ŞŪ | |
| | |

Overview

Dance in Practice focuses on experiencing and understanding the role of dance in and across communities and, where possible, interacting with practising performers, choreographers and designers.

Students create, perform and produce dance works in class, school and community contexts, and use their senses as a means of understanding and responding to their own and others' dance works. This fosters creativity, helps students develop problem-solving skills, and heightens their imaginative, emotional, aesthetic, analytical and reflective experiences.

Students explore and apply techniques, processes and technologies individually and in groups to express dance ideas that serve particular purposes. Students explore safe dance practices for themselves and groups. They gain practical and technical skills, employ terminology specific to dance, investigate ways to solve problems, and make choices to communicate through dance and about dance.

Pathways

A course of study in Dance in Practice can establish a basis for further education and employment in dance education, dance teaching, choreography, performance and event production.

Objectives

- recall terminology, concepts and ideas associated with dance
- interpret and demonstrate the technical and expressive skills required for dance genres
- explain dance and dance works
- apply dance concepts and ideas through performance and production of dance works
- analyse dance concepts and ideas for particular purposes, genres, styles and contexts
- use language conventions and features to achieve particular purposes
- generate, plan and modify creative processes to produce dance works
- create communications and make decisions to convey meaning to audiences
- evaluate dance works.

Year 11

In Units 1 and 2, students complete **four formative** assessments to prepare them for the assessment techniques in Units 3 and 4. The results from each of the assessments are added together to provide a subject score out of 100 and converted to an overall subject result (A-E).

| Unit | Unit Structure | Assessment Items | Weight |

Drama in Practice (DRP)

Applied senior subject

| QCE Ap | plied |
|--------|-------|
|--------|-------|

Prerequisite Subjects

Performance Arts T-shirt Black pants or tights

| Costs | |
|-------|--|
| \$0 | |
| | |

Overview

Drama in Practice gives students opportunities to plan, create, adapt, produce, perform, appreciate and evaluate a range of dramatic works or events in a variety of settings.

Students participate in learning activities that apply knowledge and develop creative and technical skills in communicating meaning to an audience.

Students learn essential workplace health and safety procedures relevant to the drama and theatre industry, as well as effective work practices and industry skills needed by a drama practitioner.

Pathways

A course of study in Drama in Practice can establish a basis for further education and employment in drama and theatre industry in areas such as performance, theatre management and promotions.

Objectives

- identify and explain dramatic principles and practices
- interpret and explain dramatic works and dramatic meanings
- demonstrate dramatic principles and practices
- apply dramatic principles and practices when engaging in drama activities and/or with dramatic works
- analyse the use of dramatic principles and practices to communicate meaning for a purpose
- use language conventions and features and terminology to communicate ideas and information about drama, according to purposes
- plan and modify dramatic works using dramatic principles and practices to achieve purposes
- create dramatic works that convey meaning to audiences
- evaluate the application of dramatic principles and practices to drama activities or dramatic works.

Year 11

In Units 1 and 2, students complete **four formative** assessments to prepare them for the assessment techniques in Units 3 and 4. The results from each of the assessments are added together to provide a subject score out of 100 and converted to an overall subject result (A-E).

Early Childhood Studies (ECS)

Applied senior subject

Prerequisite Subjects

Students must apply for a Blue Card Working with Children by the end of Year 10

Overview

Early Childhood Studies focuses on learning about children aged from birth to five years.

Students explore play-based learning activities from two perspectives: they use theories about early childhood learning and devise play-based learning activities responsive to children's needs.

Students examine the interrelatedness of core concepts and ideas of the fundamentals and practices of early childhood learning. They plan, justify and evaluate play-based learning activities responsive to the needs of children as well as evaluating contexts in early childhood learning. This enables students to develop understanding of the multifaceted, diverse and significant nature of early childhood learning.

Pathways

A course of study in Early Childhood Studies can establish a basis for further education and employment in health, community services and education. Work opportunities exist as early childhood educators, teacher's aides or assistants in a range of early childhood contexts.

Objectives

- describe concepts and ideas related to fundamentals of early childhood
- explain concepts and ideas of practices of early childhood learning
- analyse concepts and ideas of the fundamentals and practices of early childhood learning
- apply concepts and ideas of the fundamentals and practices of early childhood learning
- use language conventions and features to communicate ideas and information for specific purposes
- plan and justify play-based learning activities responsive to children's needs
- evaluate play-based learning activities in response to children's needs
- evaluate contexts in early childhood learning.

Year 11In Units 1 and 2, students complete **four formative** assessments to prepare them for the assessment techniques in Units 3 and 4.

| Unit | Unit Structure | Assessment Items | Weight |
|-----------|---|--|--------|
| 1 | Introduction to the Early Childhood Industry Safe Centres | 1. Exam Short response, 50 – 150 words per item 90 mins | 25% |

| |

| Prerequisite Subjects |
|-----------------------|
| Nil |
| |

| Equipment | | |
|-----------|--------|--|
| | Laptop | |

| Costs |
|-------|
| \$0 |

Overview

Essential English develops and refines students' understanding of language, literature and literacy to enable them to interact confidently and effectively with others in everyday, community and social contexts. Students recognise language and texts as relevant in their lives now and in the future and learn to understand, accept of challenge the values and attitudes in these texts.

Students engage with language and texts to foster skills to communicate confidently and effectively in Standard Australian English in a variety of contemporary contexts and social situations, including every day, social, community, further education and work-related contexts. They choose generic structures, language, language features and technologies to best convey meaning. They develop skills to read for meaning and purpose, and to use, critique and appreciate a range of contemporary literary and non-literary texts.

Students use language effectively to produce texts for a variety of purposes and audiences and engage creative and imaginative thinking to explore their own world and the worlds of others. They actively and critically interact with a range of texts, developing an awareness of how the language they engage with positions them and others.

Pathways

A course of study in Essential English promotes openmindedness, imagination, critical awareness and intellectual flexibility – skills that prepare students for local and global citizenship, and for lifelong learning across a wide range of contexts.

Objectives

- use patterns and conventions of genres to achieve particular purposes in cultural contexts and social situations
- use appropriate roles and relationships with audiences
- construct and explain representations of identities, places, events and concepts
- make use of and explain the ways cultural assumptions, attitudes, values and beliefs underpin texts and influence meaning
- explain how language features and text structures shape meaning and invite particular responses
- select and use subject matter to support perspectives
- sequence subject matter and use mode-appropriate cohesive devices to construct coherent texts
- make mode-appropriate language choices according to register informed by purpose, audience and context
- use language features to achieve particular purposes across modes.

Year 11In Units 1 and 2, students complete **four formative** assessments to prepare them for the assessment techniques in Units 3 and 4.

| Unit | Unit Structure | Assessment Items | Weight |
|-----------|-----------------------------|---|--------|
| 1 | Language that works | 1. Extended Response Multimodal, seen Spoken, 4 – 6 mins | 25% |
| (Year 11) | | 2. Response to Stimulus Written, 400 – 600 words Short response, one unseen, one seen | 25% |
| 2 | Texts and human experiences | 3. Extended Response Multimodal, seen 4 – 6 mins | 25% |
| (Year 11) | | 4. Extended Response Written, 500 – 800 words Opinion piece Extended, seen | 25% |

Year 12In Units 3 and 4, students complete **four formative** assessments. Students will also receive an overall subject result (A-E).

| Unit | Unit Structure | Assessment Items | Weight |
|-----------|---|---|--------|
| 3 | Language that influences | 1. Extended Response Multimodal, seen Spoken, 4 – 6 mins | 25% |
| (Year 12) | | 2. Response to Stimulus Short Response, one seen, one unseen Written, 400 – 600 words | 25% |
| 4 | Representations and popular culture texts | 3. Extended Response Multimodal, seen Spoken, 4 – 6 mins | 25% |
| (Year 12) | | 4. Extended Response Opinion piece, seen Written, 500 – 800 words | 25% |

Essential Mathematics (MAE)

| Equipment | |
|---------------------------------------|--|
| Colombific Colombian Coolo fo COALL | |
| Scientific Calculator – Casio fx-82AU | |

| Costs | |
|-------|--|
| \$0 | |

Overview

Essential Mathematics' major domains are Number, Data, Location and time, Measurement and Finance.

Essential Mathematics benefits students because they develop skills that go beyond the traditional ideas of numeracy.

Students develop their conceptual understanding when they undertake tasks that require them to connect mathematical concepts, operations and relations. They learn to recognise definitions, rules and facts from everyday mathematics and data, and to calculate using appropriate mathematical processes.

Students interpret and use mathematics to make informed predictions and decisions about personal and financial priorities. This is achieved through an emphasis on estimation, problem-solving and reasoning, which develops students into thinking citizens.

Pathways

A course of study in Essential Mathematics can establish a basis for further education and employment in the fields of trade, industry, business and community services. Students learn within a practical context related to general employment and successful participation in society, drawing on the mathematics used by various professional and industry groups.

Objectives

- select, recall and use facts, rules, definitions and procedures drawn from Number, Data, Location and time, Measurement and Finance
- comprehend mathematical concepts and techniques drawn from Number, Data, Location and time, Measurement and Finance
- communicate using mathematical, statistical and everyday language and conventions
- evaluate the reasonableness of solutions
- justify procedures and decisions by explaining mathematical reasoning
- Solve problems by applying mathematical concepts and techniques drawn from Number, Data, Location and time, Measurement and Finance.

Year 11In Units 1 and 2, students complete **four formative** assessments to prepare them for the assessment techniques in Units 3 and 4.

| Unit | Unit Structure | Assessment Items | Weight |

Hospitality Practices (HPJ)

Applied senior subject

| QCE 4 | Applied |
|----------|---------|
|----------|---------|

| Prerequisite Subjects | | |
|-----------------------|--|--|
| | | |
| | | |
| | | |
| | | |

| Equipment | |
|-----------|--------------------|
| | Weekly ingredients |

| Costs | |
|---------|--|
| \$50 HR | |

Overview

Hospitality Practices develops knowledge, understanding and skills about the hospitality industry and emphasises the food and beverage sector, which includes food and beverage production and service

Students develop an understanding of hospitality and the structure, scope and operation of related activities in the food and beverage sector and examine and evaluate industry practices from the food and beverage sector.

Students develop skills in food and beverage production and service. They work as individuals and as part of teams to plan and implement events in a hospitality context. Events provide opportunities for students to participate in and produce food and beverage products and perform service for customers in real-world hospitality contexts.

Pathways

A course of study in Hospitality Practices can establish a basis for further education and employment in the hospitality sectors of food and beverage, catering, accommodation and entertainment. Students could pursue further studies in hospitality, hotel, event and tourism or business management, which allows for specialisation.

Objectives

- explain concepts and ideas from the food and beverage sector
- describe procedures in hospitality contexts from the food and beverage sector
- examine concepts and ideas and procedures related to industry practices from the food and beverage sector
- apply concepts and ideas and procedures when making decisions to produce products and perform services for customers
- use language conventions and features to communicate ideas and information for specific purposes
- plan, implement and justify decisions for events in hospitality contexts
- critique plans for, and implementation of events in hospitality contexts
- evaluate industry practices from the food and beverage sector.

Year 11

In Units 1 and 2, students complete **four formative** assessments to prepare them for the assessment techniques in Units 3 and 4. The results from each of the assessments are added together to provide a subject score out of 100 and converted to an overall subject result (A-E).

| Unit | Unit Structure | Assessment Items | Weight |
|-----------|--|---|--------|
| 1 | Introduction to the Hospitality Industry | 1. Investigation • Written, 500 – 800 words | 25% |
| (Year 11) | | 2. Project Written, 400 – 700 words Product and performance | 25% |
| 2 | Restaurant Dining | 3. Project Written, 400 – 700 words Product and performance | 25% |
| (Year 11) | | 4. Exam Short response, 50 – 150 words per item 90 mins | 25% |

Year 12

| 4 | Small Business | 3. Project Written, 500 – 900 words Product and performance | 25% |
| (Year 12) | | 4. ExamShort response, 50 -250 words per item90 mins | 25% |

Industrial Graphics Skills (GSK)

Applied senior subject

Prerequisite Subjects

Year 9 & 10 Graphics would be advisable but not a prerequisite

Overview

Industrial Graphics Skills focuses on the underpinning industry practices and production processes required to produce the technical drawings used in a variety of industries, including building and construction, engineering and furnishing.

Students understand industry practices, interpret technical information and drawings, demonstrate and apply safe practical modelling procedures with tools and materials, communicate using oral and written modes, organise and produce technical drawings and evaluate drawings using specifications.

Students develop transferable skills by engaging in drafting and modelling tasks that relate to business and industry, and that promote adaptable, competent, self-motivated and safe individuals who can work with colleagues to solve problems and complete tasks.

Pathways

A course of study in Industrial Graphics Skills can establish a basis for further education and employment in a range of roles and trades in the manufacturing industries. With additional training and experience, potential employment opportunities may be found in drafting roles such as architectural drafter, estimator, mechanical drafter, electrical drafter, structural drafter, civil drafter and survey drafter.

Objectives

- describe industry practices in drafting and modelling tasks
- demonstrate fundamental drawing skills
- interpret drawings and technical information
- analyse drafting tasks to organise information
- select and ply drawing skills and procedures in drafting tasks
- use language conventions and features to communicate for particular purposes
- · construct models from drawings
- create technical drawings from industry requirements
- evaluate industry practices, drafting processes and drawings, and make recommendations.

Year 11In Units 1 and 2, students complete **four formative** assessments to prepare them for the assessment techniques in Units 3 and 4.

| Unit | Unit Structure | Assessment Items | Weight |
|--------------------|--------------------------|---|--------|

| (Year 12) | | 2. ProjectDrawingsMultimodal, 8 x A4 pages | 25% |
| 4 | Furnishing drafting 2 | 3. ProjectDrawings,Multimodal, 8 x A4 pages | 25% |
| (Year 12) | | 4. Exam Short response, 50 – 250 words per item 90 mins | 25% |

Media Arts in Practice (MAP)

Applied senior subject

| Prerequisite Subjects | |
|-----------------------|--|
| | |
| | |
| | |
| | |

Equipment

Students must have a laptop in order to undertake this course

\$50 HR

Overview

Media Arts in Practice focuses on the role media arts plays in the community in reflecting and shaping society's values, attitudes and beliefs. It provides opportunities for students to create and share media artworks that convey meaning and express insight.

Students learn how to apply media technologies in real-world contexts to solve technical and/or creative problems. When engaging with school and/or local community activities, they gain an appreciation of how media communications connect ideas and purposes with audiences. They use their knowledge and understanding of design elements and principles to develop their own works and to evaluate and reflect on their own and others' art-making processes and aesthetic choices.

Students learn to be ethical and responsible users of and advocates for digital technologies, and aware of the social, environmental and legal impacts of their actions and practices.

Pathways

A course of study in Media Arts in Practice can establish a basis for further education and employment in a dynamic, creative and global industry that is constantly adapting to new technologies.

Objectives

- identify and explain media art-making processes
- interpret information about media arts concepts and ideas for particular purposes
- demonstrate practical skills, techniques and technologies required for media arts
- organise and apply media art-making processes, concepts and ideas
- analyse problems within media arts contexts
- use language conventions and features to communicate ideas and information about media arts, according to context and purpose
- plan and modify media artworks using media artmaking processes to achieve purposes
- create media arts communications that convey meaning to audiences
- evaluate media art-making processes and media artwork concepts and ideas.

Year 11In Units 1 and 2, students complete **four formative** assessments to prepare them for the assessment techniques in Units 3 and 4.

| Unit | Unit Structure | Assessment Items | Weight |
|-----------|------------------------|---|--------|
| 4 | I Want My MTV | 1. Product • Folio | 25% |
| (Year 11) | | 2. Project Music Video Written, 400 – 700 words Short film, 3 – 5 mins | 25% |
| 2 | And the Oscar goes to? | 3. Project Short film, 3 – 5 mins Written, 400 – 700 words | 25% |
| (Year 11) | | 4. Product • Poster | 25% |

Year 12In Units 3 and 4, students complete **four formative** assessments. Students will also receive an overall subject result (A-E).

| Unit | Unit Structure | Assessment Items | Weight |
|-----------|----------------------------------|--|--------|
| 3 | Can you hear me? Can you see me? | 1. Project Radio show, 3 – 6 mins Written, 500 – 900 words | 25% |

| 4 | Graduation Dedication | 3. Product • Folio | 25% |
| (Year 12) | | 4. Project Written, 500 – 900 words Magazine, 4 – 6 pages | 25% |

Social & Community Studies (SCS)

Applied senior subject

| Prerequisite Subjects | | |
|-----------------------|--|--|
| | | |
| | | |
| | | |

| Equipment | | |
|-----------|-----|--|
| | | |
| | Nil | |
| | | |

| Costs | |
|-------|--|
| \$0 | |

Overview

Social & Community Studies focuses on personal development and social skills which lead to self-reliance, self-management and concern for others. It fosters appreciation of, respect for, cultural diversity and encourages responsible attitudes and behaviours required for effective participation in the community and for thinking critically, creatively and constructively about their future.

Students develop personal, interpersonal, citizenship skills, encompassing social skills, communication skills, respect for and interaction with others, building rapport, problem solving and decision making, self-esteem, self-confidence and resilience, workplace skills, learning and study skills.

Students use an inquiry approach in collaborative learning environments to investigate the dynamics of society and the benefits of working with others in the community. They are provided with opportunities to explore and refine personal values and lifestyle choices and to practise, develop and value social, community and workplace participation skills.

Pathways

A course of study in Social & Community Studies can establish a basis for further education and employment, as it helps students develop the skills and attributes necessary in all workplaces.

Objectives

- recognise and describe concepts and ideas related to the development of personal, interpersonal and citizenship skills
- recognise and explain the ways life skills relate to social contexts
- explain issues and viewpoints related to social investigations
- organise information and material related to social contexts and issues
- analyse and compare viewpoints about social contexts and issues
- apply concepts and ideas to make decisions about social investigations
- use language conventions and features to communicate ideas and information, according to purposes
- plan and undertake social investigations
- communicate the outcomes of social investigations, to suit audiences
- appraise inquiry processes and the outcomes of social investigations.

Year 11In Units 1 and 2, students complete **four formative** assessments to prepare them for the assessment techniques in Units 3 and 4.

| Unit | Unit Structure | Assessment Items | Weight |
|-----------|--|---|--------|
| 1 | Into relationships Gender and Identity | Exam Combination, 60 – 90 mins | 25% |
| (Year 11) | | 2. Extended response • Written, 500 – 800 words | 25% |

Sport & Recreation (REC)

Applied senior subject

| QCE 4 | Applied |
|----------|---------|
|----------|---------|

Prerequisite Subjects

Laptop; Notebook; Stationery; Sports Uniform

Costs \$0

Overview

Sport & Recreation provides students with opportunities to learn in, through and about sport and active recreation activities, examining their role in the lives of individuals and communities.

Students examine the relevance of sport and active recreation in Australian culture, employment growth, health and wellbeing. They consider factors that influence participation in sport and recreation, and how physical skills can enhance participation and performance in sport and recreation activities. Students explore how interpersonal skills support effective interaction with others, and the promotion of safety in sport and recreation activities. They examine technology in sport and recreation activities, and how the sport and recreation industry contributes to individual and community outcomes.

Students are involved in acquiring, applying and evaluating information about and in physical activities and performances, planning and organising activities, investigating solutions to individual and community challenges, and using suitable technologies where relevant. They communicate ideas and information in, about and through sport and recreation activities. They examine the effects of sport and recreation on individuals and communities, investigate the role of sport and recreation in maintaining good health, evaluate strategies to promote health and safety, and investigate personal and interpersonal skills to achieve goals.

Pathways

A course of study in Sport & Recreation can establish a basis for further education and employment in the fields of fitness, outdoor recreation and education, sports administration, community health and recreation and sport performance.

Objectives

- demonstrate physical responses and interpersonal strategies in individual and group situations in sport and recreation activities
- describe concepts and ideas about sport and recreation using terminology and examples
- explain procedures and strategies in, about and through sport and recreation activities for individuals and communities
- apply concepts and adapt procedures, strategies and physical responses in individual and group sport and recreation activities
- manage individual and group sport and recreation activities
- apply strategies in sport and recreation activities to enhance health, wellbeing, and participation for individuals and communities
- use language conventions and textual features to achieve particular purposes
- evaluate individual and group physical responses and interpersonal strategies to improve outcomes in sport and recreation activities
- evaluate the effects of sport and recreation on individuals and communities
- evaluate strategies that seek to enhance health, wellbeing, and participation in sport and recreation activities and provide recommendations
- create communications that convey meaning for particular audiences and purposes.

Year 11In Units 1 and 2, students complete **four formative** assessments to prepare them for the assessment techniques in Units 3 and 4.

Overview

Tourism studies enable students to gain an appreciation of the role of the tourism industry and the structure, scope and operation of the related tourism sectors of travel, hospitality and visitor services.

Students examine the socio-cultural, environmental and economic aspects of tourism, as well as tourism opportunities, problems and issues across global, national and local contexts.

Students develop and apply tourism-related knowledge and understanding through learning experiences and assessment in which they plan projects, analyse issues and opportunities, and evaluate concepts and information.

Pathways

A course of study in Tourism can establish a basis for further education and employment in businesses and industries such as tourist attractions, cruising, gaming, government and industry organisations, meeting and events coordination, caravan parks, marketing, museums and galleries, tour operations, wineries, cultural liaison, tourism and leisure industry development, and transport and travel.

Objectives

- recall terminology associated with tourism and the tourism industry
- describe and explain tourism concepts and information
- identify and explain tourism issues or opportunities
- analyse tourism issues and opportunities
- apply tourism concepts and information from a local, national and global perspective
- communicate meaning and information using language conventions and features relevant to tourism contexts
- generate plans based on consumer and industry needs
- evaluate concepts and information within tourism and the tourism industry
- draw conclusions and make recommendations.

Unit Structure & Assessment

Year 11In Units 1 and 2, students complete **four formative** assessments to prepare them for the assessment techniques in Units 3 and 4.

| Unit | Unit Structure | Assessment Items | Weight |

Visual Arts in Practice (VAP)

Applied senior subject

Prerequisite Subjects Nil

Equipment

Laptop with a USB port (BYOD specification - mid to top end range); Adobe Illustrator Photoshop

Costs \$50 HR

Overview

Visual Arts in Practice focuses on students engaging in art-making processes and making virtual or physical visual artworks. Visual artworks are created for a purpose and in response to individual, group or community needs.

Students explore and apply the materials, technologies and techniques used in art-making. They use information about design elements and principles to influence their own aesthetics and guide how they view others; works. They also investigate information about artists, art movements and theories, and use the lens of a context to examine influences on art-making.

Students reflect on both their own and others' art-making processes. They integrate skills to create artworks and evaluate aesthetic choices. Students decide on the best way to convey meaning through communications and artworks. They learn and apply safe visual art practices.

Pathways

A course of study in Visual Arts in Practice can establish a basis for further education and employment in a range of fields, including design, styling, decorating, illustrating, drafting, visual merchandising, make-up artistry, advertising, game design, photography, animation or ceramics.

Objectives

By the conclusion of the course of study, students should:

- recall terminology and explain art-making processes
- interpret information about concepts and ideas for a purpose
- demonstrate art-making processes required for visual artworks
- apply art-making processes required for visual artworks
- apply art-making processes, concepts and ideas
- analyse visual art-making processes for particular purposes
- use language conventions and features to achieve particular purposes
- generate plans and ideas and make decisions
- create communications that convey meaning to audiences
- evaluate art-making processes, concepts and ideas.

Overview

Literacy is a one-unit course of study, developed to meet a specific curriculum need. It is informed by the Australian Core Skills Framework (ACSF) Level 3.

Literacy is integral to a person's ability to function effectively in society. It involves the integration of speaking, listening and critical thinking with reading and writing.

Students learn strategies to develop and monitor their own learning, select and apply reading and oral strategies to comprehend and make meaning in texts, demonstrate the relationships between ideas and information in texts, evaluate and communicate ideas and information, and learn and use textual features and conventions.

Students identify and develop a set of knowledge, skills and strategies needed to shape language according to purpose, audience and context. They select and apply strategies to comprehend and make meaning in a range of texts and text types, and communicate ideas and information in a variety of modes. Students understand and demonstrate the relationship between ideas and information in written, oral, visual and multimodal texts.

Pathways

A course of study in Literacy may establish a basis for further education and employment in the fields of trade, industry, business and community services. Students will earn within a practical context related to general employment and successful participation in society, drawing on the literacy used by various professional and industry groups.

Objectives

By the conclusion of the course of study, students will:

- evaluate and integrate information and ideas to construct meaning from texts and text types
- select and apply reading strategies that are appropriate to purpose and text type
- communicate relationships between ideas and information in a style appropriate to audience and purpose
- select vocabulary, grammatical structures and conventions that are appropriate to the text
- select and use appropriate strategies to establish and maintain spoken communication
- derive meaning from a range of oral texts
- plan, implement and adjust processes to achieve learning outcomes
- apply learning strategies.

Structure and assessment

Schools develop two assessment instruments to determine the student's exit result.

| Topic 1: Personal identity and education | Topic 2: The work environment |

Overview

Numeracy is a one-unit course of study developed to meet a specific curriculum need. It is informed by the Australian Core Skills Framework (ACSF) Level 3.

Numeracy is integral to a person's ability to function effectively in society. Students learn strategies to develop and monitor their own learning, identify and communicate mathematical information in a range of texts and real-life contexts, use mathematical processes and strategies to solve problems, and reflect on outcomes and the appropriateness of the mathematics used.

Students identify, locate, act upon, interpret and communicate mathematical ideas and information. They represent these ideas and information in a number of ways, and draw meaning from them for everyday life and work activities. Students use oral and written mathematical language and representation to convey information and the results of problem-solving activities.

Pathways

A course of study in Numeracy may establish a basis for further education and employment in the fields of trade, industry, business and community services. Students will earn within a practical context related to general employment and successful participation in society, drawing on the mathematics used by various professional and industry groups.

Objectives

By the conclusion of the course of study, students will:

- select and interpret mathematical information
- select from and use a variety of developing mathematical and problem-solving strategies
- use oral and written mathematical language and representation to communicate mathematically
- plan, implement and adjust processes to achieve learning outcomes
- apply learning strategies.

Structure and assessment

Schools develop two assessment instruments to determine the student's exit result.

| Topic 1: Personal identity and education | Topic 2: The work environment | |
|---|--|--|
| One assessment consisting of two parts: extended response — oral mathematical presentation a student learning journal | One assessment consisting of two parts: an examination — short response student learning journal | |

Vocational Education & Training (VET)

Certificate III – Active Volunteering (VVL)

Vocational senior subject (VET)

| Prerequisite Subj | ects | | |
|-------------------|------|--|--|
| | | | |
| | | | |
| | | | |
| | | | |

Equipment

1 pair of gardening gloves 1 broad brimmed hat

\$50 HR
Excursions
Camps

Overview

Completing a Certificate III – Active Volunteering offers students the opportunity to build their capacity as young adults to engage with their community as an active citizen. This nationally recognised certification allows students to engage with the world by developing 'hands on' skills that will build confidence and instil a sense of connection with the wider community. Upon completing this qualification, students can transition into further vocational education, as it provides a link to other certificates and diplomas through the TAFE system in a variety of areas within community services. In studying this course, students will develop resilience, demonstrate initiative and gain invaluable networking experience through their volunteering placements.

Pathways

By completing a Certificate III – Active Volunteering students can go on to study at TAFE in areas such as; community health, social services, family support, youth work and disability support.

Objectives

Upon completion of this certificate, students will:

- add value to their school community and develop employability skills
- learn to transition from school to life in employment and the community
- develop workplace networks
- develop pathways into a broad range of industry areas including community service, sport and recreation, health, emergency services and human rights/justice sectors
- make a difference in their community and develop their social consciousness.

Certificate III in Aviation – Remote Pilot – Visual Line of Sight (AVI30616) and Certificate II – Surveying and Spatial Information Services (CPP20116) (AVI)

QCE 8

Costs \$50 HR

Overview

Upon completion the Certificate III in Aviation (Remote Pilot – Visual Line of Sight) AVI30616 students will be eligible for a Remote Pilot License (RePL), pending CASA approval. This will allow students to legally operate a remotely piloted aircraft (RPA) for commercial purposes. It will also allow students to fly without many of the weight or operating restrictions applied to recreational users.

Students will also receive an Aeronautical Radio Operators Certificate (AROC) and an English Language Proficiency (ELP) Test Certification. This is a CASA requirement to use aviation VHF radios, which are needed when flying near aerodromes and helipads.

Students will also complete a Certificate II in Surveying and Spatial Information Services CPP20116. This will introduce the basics of surveying and learn to apply drone technology in a variety of growing spatial industries. Students will also learn how to produce 2D and 3D computer models, be introduced to Geographical Information Systems (GIS) and learn to interpret satellite images and produce digital maps.

Pathways

Drone and spatial technology is an emerging industry and learning opportunities exist within the University / TAFE and Private Registered Training Organisation space. Career outcomes include:

- Filming (Events, Tourism and Real Estate)
- Design and Engineering
- Asset Inspections
- Resource and Mining
- Agriculture
- Disaster Management
- · Mapping and aerial surveying
- Geographical Information Systems

Objectives

By the conclusion of the certificates, students will:

- competently and safely operate drones
- adhere to legislation and regulations in drone operations
- be confident to work and communicate in teams
- apply drone technology to a variety of spatial applications
- understand and assist in basic surveying tasks
- basic understanding of geospatial software and its application

The course is delivered in partnership with Aviation Australia and is additionally funded under the VETiS Queensland government training incentives. Students can only complete one (1) VETiS funded course whilst at school.

Assessment - Certificate III in Aviation - Remote Pilot - Visual Line of Sight (AVI30616)

Units of Competency

| Code | Competency |
|----------|--|
| AVIE0001 | Operate Aeronautical Radio |
| AVIF0013 | Manage human factors in remote pilot aircraft systems operations |
| AVIF3023 | Apply regulations and policies during remote pilot aircraft systems operations |
| AVIH3019 | Navigate remote pilot aircraft systems |
| AVIK3002 | Use info technology devices in an aviation workplace |
| AVIW3037 | Manage remote pilot aircraft systems pre- and post-flight actions |
| AVIW3038 | Operate and manage remote pilot aircraft systems |
| AVIY3073 | Control remote pilot aircraft systems on the ground |
| AVIY3074 | Launch remote pilot aircraft systems |
| AVIY3075 | Control remote pilot aircraft systems in normal flight |
| AVIY3076 | Recover remote pilot aircraft systems |
| AVIY3077 | Manage remote pilot aircraft systems in abnormal flight situations |
| AVIY3078 | Manage remote pilot aircraft systems energy source requirements |
| AVIZ3052 | Apply situational awareness in remote pilot aircraft systems operations |

Assessment – Certificate II in Surveying and Spatial Information Services (CPP20116)

Units of Competency

| omits of competency | |
|---------------------|---|
| Code | Competency |
| CPCCWHS1001 | Prepare to work safely in the construction industry |
| CPPSIS2012 | Assist in collecting basic spatial data |
| CPPSIS2013 | Store and retrieve basic spatial data |
| CPPSIS3011 | Produce basic maps |
| ICTICT101 | Operate a personal computer |
| ICTICT203 | Operate application software packages |
| RIISTD201D | Read and interpret maps |
| CPPSIS2015 | Assist with surveying and spatial field activities |
| | |

The course is designed to be assessed using the following techniques:

- Teacher Observation & Questioning
- Projects
- Tests
- Field Work

VET SPORTS @NERANG

Certificate III - Sport and Recreation (SIS30115) (XSR)

VETiS Supported

Prerequisite Subjects

Equipment

Laptop; Notebook; Stationery; Sports Uniform Costs \$50 HR Excursions Camps

Overview

The Certificate III - Sport and Recreation program is offered as a senior subject where students participate in the delivery of a range of sport activities and programs within the school. Graduates will be competent in a range of essential skills — including officiating games or competitions, coaching beginner participants to develop fundamental skills, communication and customer service in sport, and using social media tools for participant engagement.

This program also includes the following:

- First Aid qualification and CPR certificate;
- Officiating and coaching accreditations (general principles or sport-specific)

Program delivery will combine both class-based tasks and practical components in a real sport environment at the school. This involves the delivery of a range of sport programs to real participants within the school community (high school and primary school students). A range of experiences will be used to deliver the competencies to students, including:

- · Practical tasks
- Hands-on activities involving participants/clients
- Group work
- Practical experience within the school sporting programs
- Log Book of practical experience

Evidence contributing towards competency will be collected throughout the course. This process allows a student's competency to be assessed in a holistic approach that integrates a range of competencies. Practical experiences have been timetabled within class time. Students will keep a Log Book of these practical experiences (minimum 20 hours).

Pathways

By completing a Certificate II – Sport and Recreation students can go onto study at TAFE in areas such as; community health, social services, family support, youth work and disability support.

A range of career pathway options including:

- Club Level Official
- Club Level Coach
- Sport retail
- First aid officer
- Local club coordinator
- Team trainer
- Community manager
- Strength and Conditioning coach
- Game Development Officer
- Facility Coordinator

Further pathways include:

- Certificate IV
- Diploma

Objectives

The Certificate III - Sport and Recreation will predominantly be used by students seeking to enter the sport, fitness and recreation industry as a community coach, sports coach, athlete, volunteer or activity assistant.

The course is delivered in partnership with Binnacle Training and is additionally funded under the VETiS Queensland government training incentives. Students can only complete one (1) VETiS funded course whilst at school.

Overview

The course that Nerang State High School is offering spans Year 11 and 12 and is a Vocational Program.

The program consists of 5 subject areas:

4 core subjects

- Mathematics
- English
- Skills for Work Vocational Pathways
- Certificate I Construction

And 1 elective subject

- Certificate II Engineering Pathways or
- Certificate II Furniture Making Pathways

Students will be also be required to complete regular work experience as part of the program.

The program will be delivered in partnership with Core Industry Training CIT (RTO Code: 91712) and operate from the Gold Coast Resources Industry Trade Skills Centre (GCRITSC) at Nerang SHS.

This is an excellence program for trade students which has a key focus on transitioning students to trade employment.

Therefore, a commitment needs to be made to regular work experience, a \$50 fee additional to the school resource scheme is required and provision of Industry standard Personal Protection Equipment (steel cap boots, clothing) laptop and phone.

As positions are limited, please complete the application provided at SET plan meeting. Priority will be given to students seeking genuine pathways into this Industry and payment of initial fees.

An interview with the Head of Department will be required to determine eligibility.

Certificate I Construction (CPC10111) (VCN)

VETiS Supported

Prerequisite Subjects

Junior ITD (C); Certificate I Furnishings I preferred, but not mandatory; Enrolment suitability application and interview

Equipment

Suitable Industry standard work wear (steel cap boots, long sleeve work shirt and pants)

\$50 HR

Overview

Students will be required to comply with Workplace Health and Safety practices as explained by teachers and will include, wearing safety glasses, aprons and face shields where necessary in the workshops. These will be supplied by the school.

The course is project-based and comprises a number of specific but inter-related units of competency, in which students have the opportunity to demonstrate their competency to appropriate industry standard. Skills and underpinning knowledge developed by students are assessed through practical and theoretical activities. Students build on the skills acquired in Year 10 and begin modular and basic construction of furniture.

Pathways

- Carpenter
- Cabinetmaker
- Plaint Operator
- Concreter
- Site Work
- Site Foreman

Objectives

By the conclusion of the course of study, students should:

- work competently with general and civil construction making materials, hand and power tools and machines
- be confident to work and communicate in teams
- produce general and civil construction products.

This course is delivered in partnership with Core Industry Training CIT and is additionally funded under the VETIS Queensland government training incentives. Students can only complete one (1) VETIS funded course whilst as school.

Structure

| Unit 1 | Unit 2 | Unit 3 | Unit 4 |

Overview

Students will be required to comply with Workplace Health and Safety practices as explained by teachers and will include, wearing safety glasses, aprons and face shields where necessary in the workshops. These will be supplied by the school.

This course will provide students with Certificate II level qualification that will assist them finding employment in areas such as mining, building and engineering. The course is project-based and comprises a number of specific but inter-related units of competency to appropriate industry standard. Skills and underpinning knowledge developed by students are assessed through practical and theoretical activities and students gain an understanding of the engineering industry by introducing them to practical based projects, hand and power tools, welding, occupational health and safety.

Pathways

- Mechanical engineer
- Electrical engineer
- Technical illustrator
- Environmental designer
- Technology teacher
- Fashion/textile designer
- Town planner
- Fine artist
